

# ALUMI-Clad™

DOOR FRAME PROTECTION SYSTEM

Available Colors\*:

\* Colors may vary from this printing - See your sales representative for actual color samples.

The HOME GUARD® pre-finished 22 gauge entry door now offers ALUMI-Clad™, the ultimate EXTRUDED cladding system. This unique product allows you to sell a totally maintenance-free exterior on the market's finest entry door. The cladding is a two-part system that covers the exterior portion of the wood jambs and replaces the wood brick mold system with an exact brick mold shape in heavy-walled, extruded aluminum. All fasteners are concealed for a clean, beautiful appearance. The ALUMI-Clad™ system is currently available for single or double new construction doors with jamb depths of 4-9/16" and 6-9/16". ALUMI-Clad™ is sold installed exclusively on HOME GUARD® entry doors. Call your HOME GUARD® representative today for details on this exciting new product.
